

The Editor Toolbar

Editor Button – Activates a pull-down menu that allows you to start, stop, and save edits, as well as other actions that you likely will not use

The Editor Toolbar, cont'd

Editor Tool – Allows you to select features for editing

The Editor Toolbar, cont'd

Sketch Tool – Allows you to add points, lines, and polygons. You will use this feature to add new stations to the database when existing stations do not satisfy network goals.

The Editor Toolbar, cont'd

Task Control – Sets the current editing task to be performed

The Editor Toolbar, cont'd

Target Layer Control – Specifies the data layer in which to store new features

The Editor Toolbar, cont'd

Split Tool – Divides one selected feature into two; not likely to be needed.

The Editor Toolbar, cont'd

Rotate Tool – Rotates features by a user-defined angle; not likely to be needed.

The Editor Toolbar, cont'd

Shared Edit Tool – Selects a common point or edge shared by two features for editing; not likely to be needed.

The Editor Toolbar, cont'd

Attributes – Allows you to display and edit feature attributes

The Editor Toolbar, cont'd

A B

C

Unless you need to add a new station, you will need to use only the Editor Button (A) to start, stop, and save edits, the Editor Tool (B) to select features, and the Attributes Button (C) to edit features
